(54) Title: AUTOMATED SENDING OF PRECONFIGURED MESSAGES

(57) Abstract: The present invention relates to a method and an electronic equipment of sending special messages as well as a program product including program code for performing the method and a program element including such code. A control unit retrieves date information from an electronic data determination unit and first recipient related information relating to a recipient from an electronic contact register. The control unit then effectuates essentially automatic sending of a special pre-configured electronic message to the recipient in dependence of the date information and the first recipient related information.
